Adapco, Inc.

IMPACT

Bringing quality and unique technologies to mosquito control nationwide

Inside Spread, Pages 1 & 2:

Powerful IMPACT

Adapco, Inc. is the largest full-line distributor of chemical products and spray equipment designed exclusively for the control of mosquitoes and mosquito-borne diseases. The company has distributed chemical products since 1985, featuring the products of the worlds' most prestigious manufacturers.

Adapco, Inc. specializes in

larvicides, for the control of mosquitoes in their aquatic habitat,

adulticides, for the control of mosquitoes after they reach the adult flying and biting stage,

diluents and flushing solutions, and

a complete range of pumps, foggers, sprayers, and associated mosquito control application equipment.

For a complete list of our products, check our web site at <http://www.e-adapco.com>

Accurate IMPACT

Adapco, Inc. leads the vector control industry with technological innovation, incorporating GPS, GIS and meteorological data to monitor and more accurately apply pesticides. Our advanced research and development group has designed and engineered specialized products such as:

Monitor 3L – a variable flow ground vehicle system which monitors and records vehicle operating speed, heading, ground speed, chemical flow rate, spray switch status, and vehicle location according to GPS data, allowing control districts to monitor where, when and how much chemical is being applied

Accuflow – variable flow pump control for mid-level users of ground vehicles, complete with GPS data

Wingman (with Kitoon) – a two-part aerial spray control system which measures ground and release height meteorological data, and combines this information with aircraft type, size and speed, droplet size, and provides flight guidance and flight recording through a predictive modeling program to determine offsets and flight path for maximum spray effectiveness

FFast – precise mixing system for water-based chemicals (such as Aqua-Reslin)

Positive IMPACT

Adapco, Inc.'s well-regarded biologists, entomologists, project managers, and sales representatives provide proven, time-tested recommendations for targeted control solutions.

Our highly trained employees work exclusively in the field of mosquito control. They understand the unique biological imprint of each species, and the varied requirements for effective control in different habitats and in different stages of their life cycle. Our sales consultants are located in different regions of the country, and each brings a unique perspective to vector control.

Maximum IMPACT

Maximum impact is what you get when three industry leaders join together to create one comprehensive team. The IMPACT team leads the way with:

- *the best chemical products distributed by Adapco, Inc. and Fennimore Chemicals*
- *accurate GPS-driven application and monitoring technologies designed and built exclusively by Adapco, and*
- *outstanding surveillance, custom mosquito control solutions, and quality assurance from VDCI*

The best products, the best people, and the best service from the powerful family of companies forming IMPACT, the Integrated Mosquito Prevention and Control Team.

Back Cover:

Adapco, Inc. has been a trusted and knowledgeable supplier to the mosquito control community for nearly two decades, designing specialized products and distributing the best in chemicals and spray equipment. Now, we're able to serve those districts and other organizations which want to contract out their mosquito control projects to the best in the business.

The best products, the best people, and the best service from IMPACT, the Integrated Mosquito Prevention And Control Team
